

measuring guide

- measure in inches to the nearest quarter inch
- measure each cabinet, shelf, and drawer
- each measurement should include height, width, and depth
- measurements should come from the interior of drawers and cabinets
- make note of all hinges, lips, pipes, and other obstructions (where and what size these obstructions are will impact our product recommendations for cabinets and shelving)
- please include shelf quantity and which (if any) of the shelves are adjustable
- when sharing your measurements, please label them as clearly as possible so that we are able to easily match your measurements to what is in your photos
- if you are unsure how to measure a certain space, remember, the more detail the better. if you are still unsure, feel free to email sumner@thehomeedit.com
